CARBON REVENUES: FROM CLIMATE ISSUES TO FISCAL BENEFITS

16 November 2017

Dr. Sébastien Postic

SIDE-EVENT:
*Accelerating Carbon pricing to support
sustainable development*

Bonn, COP23

An ongoing study on carbon revenues – first results

Carbon pricing: use of revenues (in millions of euros)

Field study

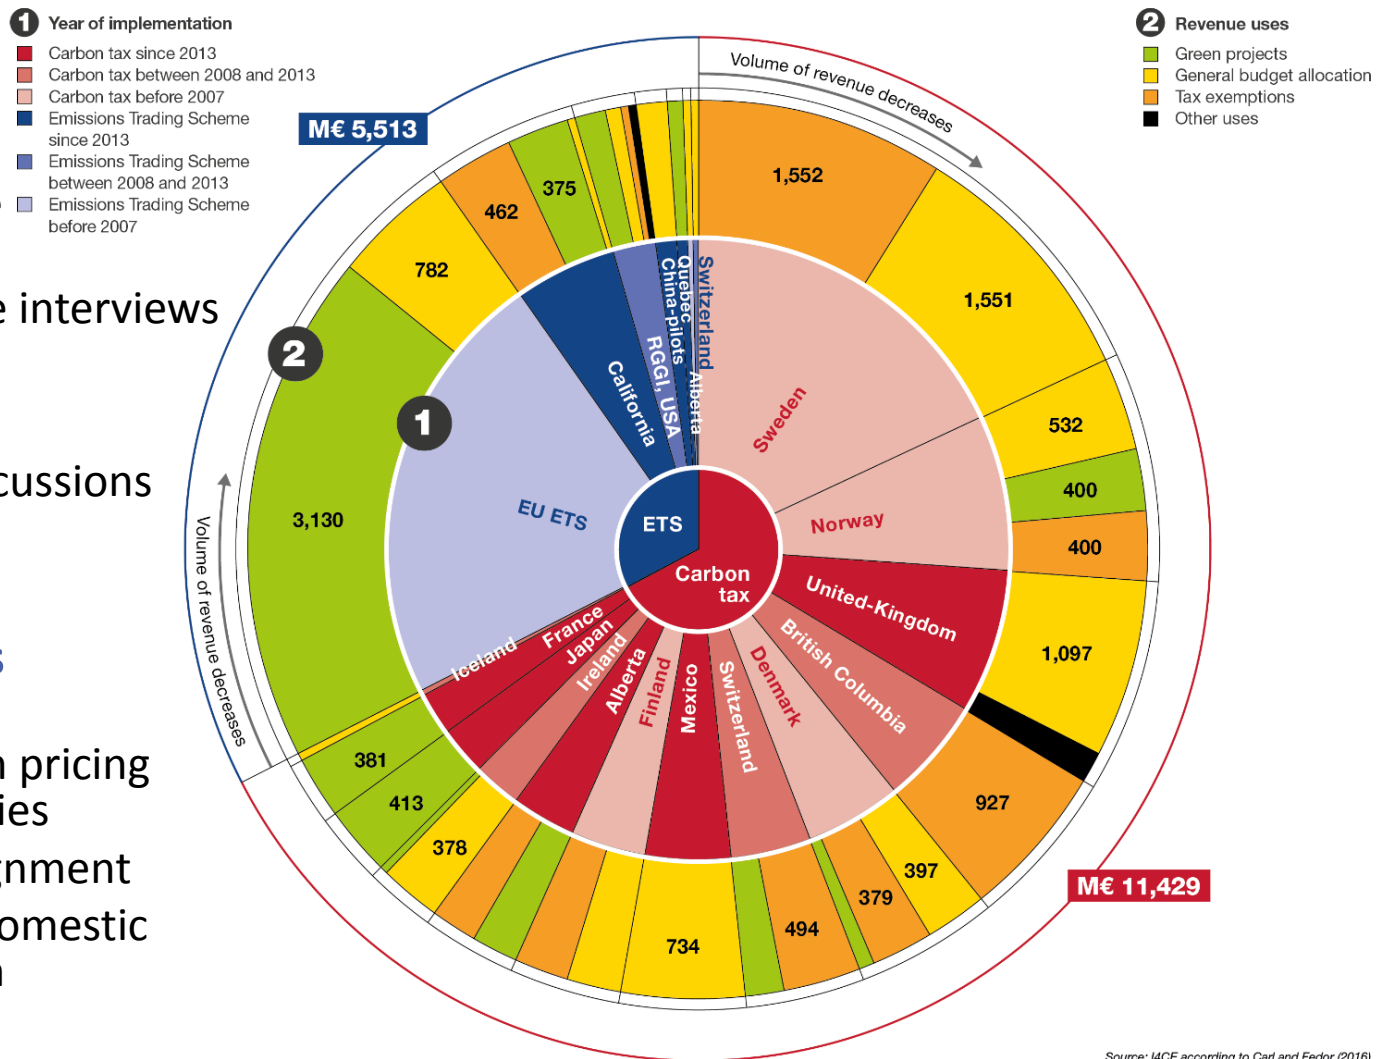

- Desk review
- Online questionnaire to practitioners
- Targeted face-to-face interviews

Usable material for policymakers

- List of issues and discussions
- Concrete examples
- Broad reviews

Development focus

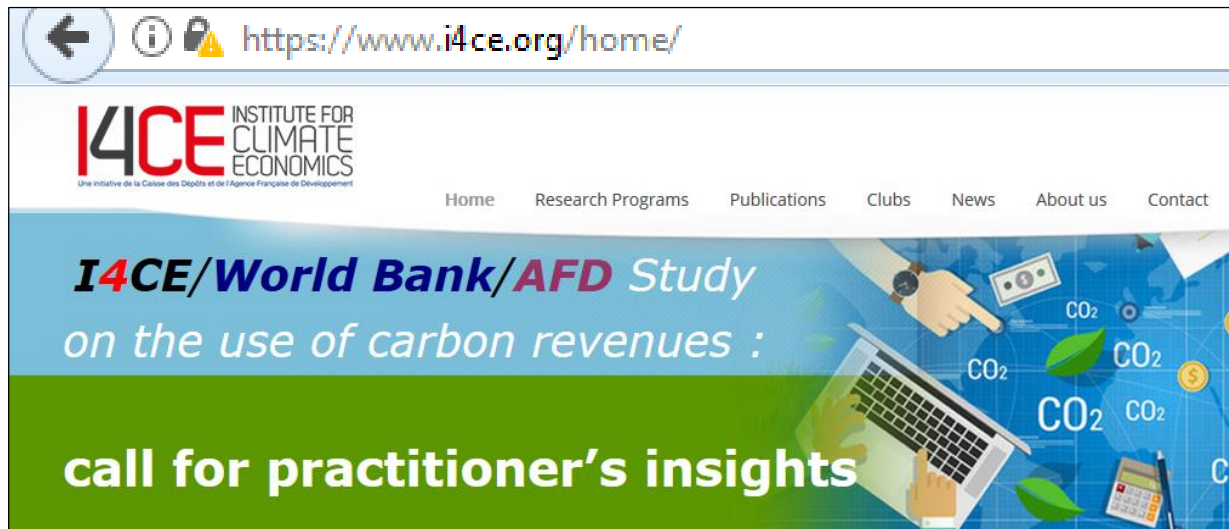

- Transposing existing experience to carbon pricing in developing countries
- A need for policy alignment
- An opportunity for domestic revenue mobilization
