CLIMATE AND AGRICULTURE CLUB

Claudine Foucherot

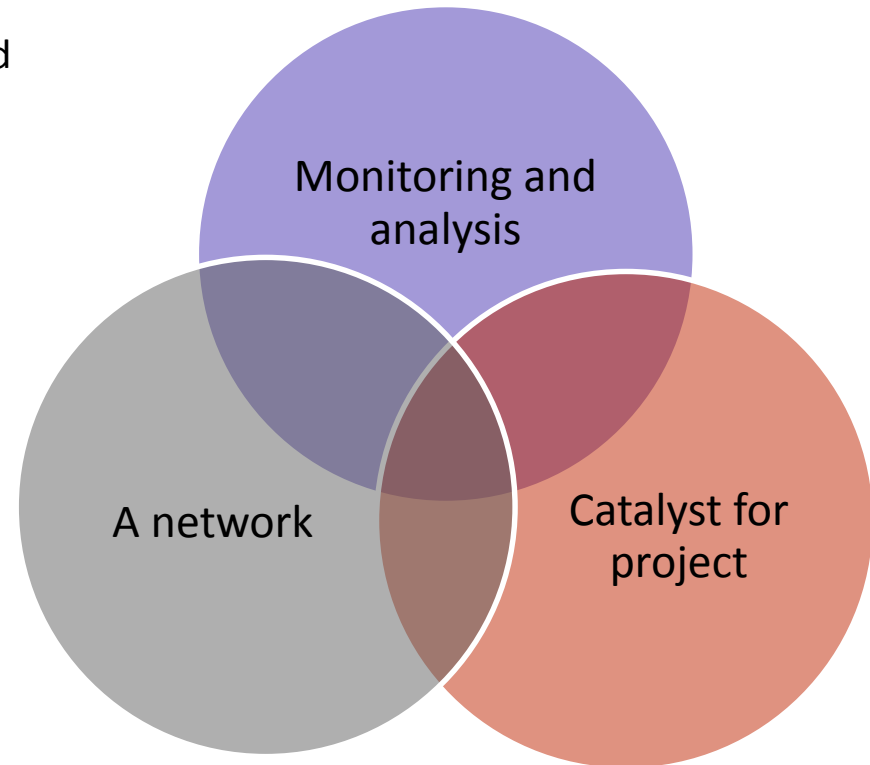

Why ? Promoting and sharing knowledge but not only...

- **Facilitate** the transition towards a low carbon and climate resilient agricultural sector
- **Analyze, understand and use** existing economic and political incentives to maximize its mitigation contribution

What is it exactly ?

Monitoring and analysis of scientific and Economic issues, public policies and existing economic instruments

- **A network of pro-active actors** collectively appropriating new knowledge with a common language and giving meaning to it through joint projects or within their respective structures.

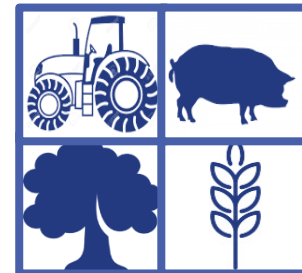

- **Development of new incentive tools:** Example of the VOCAL project (developed later)

Who?

Voluntary Carbon Land certification (VOCAL)

Carbon certification scheme for emissions reduction projects

Monitoring, Reporting and Verification

**National Framework : French Environment
Ministry validation
Voluntary**

Forestry and agriculture sectors

Carbon certification reduction scheme for emission reduction projects

Need for mitigation actions finance

Communicate on the efforts already made

Guarantee project quality

Quantify environmental impact of the project

Contribution to national target

Improve data on abatement costs

Improve national GHG inventory

Farmers or project proponent

Public and private financiers

Public authorities

Partners and stakeholders

In conclusion

- **Gather stakeholders interested in climate and agriculture issues**
- **Share and create expertise and knowledge and a common language**
- **Develop new projects together**

**... to facilitate the transition towards a low carbon
and climate resilient agricultural sector !**

Thank you for you attention !
